

# ReServe Anywhere®

“After reviewing many options, we selected ReServe Interactive’s web-based software for implementation throughout our McCormick & Schmick’s properties to help us enhance communication and efficiency.”

*Jeff Skeele,*  
Senior Vice President of Operations

The web-based solution that helps you work *smarter, faster and better* from anywhere

**ReServe Interactive.** *You’ve never worked like this before.*

ReServe Anywhere®, ReServe Interactive’s web-based software, provides you with the ultimate level of accessibility and control over your hospitality operations. With all of the features and functionality of ReServe Desktop, this secure, online application allows you and your team access to your Catering, Event Management, Dining Reservation and Table Management software from anywhere you have an Internet connection. From reservation activity to event information, guest history to reporting data, ReServe Anywhere keeps you informed with instantaneous, real-time data that lets you keep a finger on the pulse of your business 24 hours a day, 7 days a week.

## BENEFITS

---

### **Your Business, At Your Fingertips**

Whether you are at home, on the road or in your hotel room, ReServe Anywhere allows you the freedom and flexibility to securely connect to your business from anywhere, at anytime.

### **Your Information, Easily Accessible**

Analyze real-time data on an enterprise or unit level with ReServe’s comprehensive reporting features. Manage multiple properties in one database without having to install and manage a network infrastructure.

### **Your Bottom Line, Improved**

Through dedicated, remote hosting, ReServe Interactive helps you save money by eliminating the need to purchase an expensive network infrastructure, server computers and extra hardware, as well as hire and manage additional IT staff.

### **Our Commitment, Our Guarantee**

Rely on enterprise-class security with dedicated servers that host the ReServe Anywhere application to ensure data integrity and guarantee uptime. We manage back-ups, database maintenance and product upgrades for you.

## Key Features

### **Full-featured functionality:**

Access all of the features and benefits of the ReServe Interactive software suite – Catering, Event Management, Dining Reservations or Table Management – via a secure, online system.

### **Remote access:**

Stay connected to critical business data from anywhere, at anytime, with a simple Internet connection.

### **Multi-property management:**

Centralize multiple units into one database to facilitate consolidated customer information, effective cross-selling and comprehensive reporting at an enterprise or unit level.

### **Real-time data:**

View live data anytime as property activity is updated real-time via the Internet to ReServe's central servers, including event bookings, reservations, table status, customer histories and more.

### **Hosted solution:**

Rely on ReServe's feature-rich enterprise-class native Web, true thin-client solution accessed over your default Internet port using TCP/IP.

## *ReServe Anywhere® Hosted Solution System Requirements*
